Course Specification valid to:			

Academic Staff

Course Leader:	Mr Julian Smith
Head of Department:	

Course Information

Location of Delivery:	Wolverhampton Wanderers Foundation
Category of Partnership:	Off-site delivery of University Provision
Teaching Institution:	University of Wolverhampton
Open / Closed Course:	This course is open to all suitably qualified candidates.

Entry Requirements:

Entry requirements are subject to regular review. The entry requirements applicable to a particular academic year will be published on the University website (and externally as appropriate e.g. UCAS

The entry requirements are in line with other UoW FD courses and are regionally competitive.

Applicants should have 40 UCAS points made up of a combination of the following:

- A Levels with a minimum grade of D, E
- BTEC Extended Diploma grade PPP, BTEC QCF Diploma grade MP
- Access to HE Diploma full award
- If you've got other qualifications or relevant experience, please contact The Gateway for further advice before applying

Other Requirements

Entry to this course requires a Disclosure and Barring Service (DBS) Check and an Occupational Health Check.

Applicants must usually have studied for a minimum of two years post GCSE level. However, we will consider applications from mature students who do not have two years of post-16 study, where they have relevant work experience. Please see http://wlv.ac.uk/mature for further information.

Distinctive Features of the Course:

• This is an offsite delivery of a University of Wolverhampton course facilitated by Wolves Foundation, combining academic study with industry experience placements.
• Unique access to Molineux Stadium facilities and industry-standard learning environments.
• Employability focused with micro-placements embedded in each module, giving you continuous practical experience with mentorship from practitioners.
• There is an opportunity for placements to develop into paid casual employment with Wolves Foundation
• Focus on community-based and inclusive coaching, working with diverse groups and real participants in a variety of settings.
• Opportunities to contribute to real-world Wolves Foundation projects that promote health, education, and community wellbeing.
• Alignment with CIMSPA professional standards, ensuring your skills meet current professional expectations.
• Graduate with the skills, knowledge and practical work experience valued by employers, and the network and know-how to gain employment in the sports industry.

If you’re passionate about sport, enjoy working with people, and want to make a difference in your community, this Foundation Degree in Sport Coaching is designed for you. You will learn how to coach effectively with diverse participants, plan, deliver and evaluate projects, and develop the professional skills that employers in the sport and community sectors value most. By the time you graduate, you’ll have the confidence, knowledge, and practical experience to deliver coaching sessions, lead community sport projects, and demonstrate your impact to future employers.

This course is delivered with support from Wolves Foundation, the official charity of Wolverhampton Wanderers FC. You will benefit from studying in a professional sporting environment and from the expertise, resources, and networks of both the University of Wolverhampton and Wolves Foundation. Teaching takes place at the Foundation’s facilities, including a pitch-side classroom at the iconic Molineux Stadium, home of Wolves since 1889, with practical sessions delivered at The Dome, Aldersley Leisure Centre.

This degree blends theory with practice, ensuring that what you learn in the classroom is applied directly to real-world contexts. Through micro-placements linked to each module, you’ll gain hands-on experience and mentorship in live coaching and community sport environments. Employability-focused modules and career development opportunities will help you build networks and explore pathways in coaching and the wider sport and physical activity industry.

You’ll have opportunities to contribute to Wolves Foundation projects and campaigns that motivate, educate, and inspire people to live healthier, more active lives — developing skills, confidence, and stronger communities. Personalised mentoring and career planning throughout the course will help you prepare for graduate-level employment.

You will have the opportunity to progress to BA (Hons) Sports Coaching (top-up) upon successful completion of your FD Sports Coaching.

Overview of Assessment:

As part of the course approval process, the course learning outcomes were mapped to each of the modules forming the diet of the programme of study. This process confirmed that all course learning outcomes can be met through successful completion of the modules. This mapping applies to the final award as well as to all of the intermediate awards.

Learning Outcomes	Modules
CERTED01 Demonstrate knowledge of the underlying concepts and principles associated with your area(s) of study, and an ability to evaluate and interpret these within the context of that area of study	
CERTED02 Demonstrate an ability to present, evaluate and interpret qualitative and quantitative data, in order to develop lines of argument and make sound judgements in accordance with basic theories and concepts of your subject(s) of study.	
CERTED03 Evaluate the appropriateness of different approaches to solving problems related to your area(s) of study and/or work	
CERTED04 Communicate the results of your study/work accurately and reliably, and with structured and coherent arguments	

Learning Outcomes	Modules
CERTED05 Demonstrate the qualities and transferable skills necessary for employment requiring the exercise of some personal responsibility	
CERTHE01 Demonstrate knowledge of the underlying concepts, theories and principles associated with your area(s) of study (Knowing).	
CERTHE02 Evaluate, interpret and apply data, to develop ideas and discussion in your subject(s) of study (Knowing).	
CERTHE03 Use different approaches to solving problems related to your area(s) of study (Doing).	
CERTHE04 Communicate the results of your study/work accurately and reliably, and with structured and coherent arguments (Doing).	
CERTHE05 Identify and undertake further training and develop new skills to support your learning (Being).	
CERTHE06 Identify personal qualities and transferable skills necessary for further study and/or employment (Being).	
FD01 You will be able to demonstrate critical understanding of the principles, theories, and pedagogical approaches that underpin sports coaching and community development, and articulate how these underpin effective participation and performance in a range of contexts (Knowing).	
FD02 You will be able to construct arguments and solve practical problems in sports coaching and development using appropriate theories, pedagogical models, and industry-relevant techniques (Knowing).	
FD03 You will be able to apply methods and techniques from sports coaching, sport development, and related disciplines to design, deliver, and review coaching sessions, projects, and initiatives in community sport settings, making reference to evidence informed practice (Doing).	
FD04 You will communicate evidence, ideas, and reflections on coaching and sport development practice, demonstrating the ability to adapt communication for both specialist and non-specialist audiences (Doing).	
FD05 You will exercise personal responsibility and decision-making in coaching and development practice, drawing upon analytical techniques and problem-solving skills to address complex and unpredictable situations in sport and community settings, while reflecting on the values and ethics that shape inclusive coaching practice (Being).	
FD06 You will recognise, reflect upon, and evidence transferable and professional skills relevant to employment in sport coaching and development (Being).	

Teaching, Learning & Assessment Strategy/(Learning and Teaching):

This course is structured to help you build confidence step by step — beginning with the essential foundations of coaching and community development before progressing to more complex and independent practice. At Level 4, you will focus on developing a solid understanding of key principles

and frameworks through interactive workshops, seminars, and guided placement experiences. Activities are designed to introduce new ideas in a supportive way, helping you gain confidence in academic writing, teamwork, and digital skills before applying them to more advanced tasks.

As you progress to Level 5, you will take on greater responsibility for your learning, leading projects and placements that connect theory to practice. This gradual increase in independence means you can apply what you've learned in real-world contexts while developing the reflective, analytical, and leadership skills expected of a sport professional.

Learning is delivered through a blend of in-person and online activities that are flexible and accessible. Workshops, practical sessions, and guest lectures at the Wolves Foundation give you hands-on experience, while online resources help you consolidate learning at your own pace. All slides and resources used in lectures and workshops will be placed online for you to refer back to. The online learning environment is easy to navigate and designed to support different learning preferences, allowing you to revisit key content whenever you need.

Academic and digital skills are embedded throughout your studies rather than taught separately. You'll develop confidence using digital tools for research, presentation, and collaboration. Support from your student success coach and lecturers ensures you can build these skills progressively, with feedback to help you improve at each stage.

Professional practice is woven into every level of the course. Placements, live briefs, and applied projects allow you to work directly with community groups and sport organisations, linking academic concepts to the realities of professional environments. You'll also develop digital fluency in line with professional expectations — learning to use technology ethically and effectively, including the responsible use of AI and data within sport settings. Upon completion of the course, you'll have the confidence, skills, and professional awareness needed to thrive in an evolving, digital sport industry.

Assessment Methods/Assessments:

Assessment on this course is designed to help you learn, improve, and demonstrate your skills in ways that are relevant to real-world coaching and community sport contexts. You'll experience a mix of assessment types — including practical coaching sessions, reflective portfolios, presentations and written reports — so you can showcase your strengths in different ways. There will be time built in during modules to develop sections of your assessment to help you manage your workload.

At Level 4, assessments focus on helping you build confidence and apply foundational knowledge. Early, low-stakes assessments and formative tasks give you the chance to practise key skills before completing final submissions. You'll receive constructive feedback from tutors, peers, and mentors to help you understand how to improve.

As you progress to Level 5 and beyond, assessments become more applied and independent, encouraging you to think critically, solve problems, and link theory to practice. You'll take on projects such as planning, managing ad delivering a community event, or evaluating the impact of a coaching intervention. These authentic assessments mirror the tasks you'll encounter in professional roles, helping you develop confidence and employability.

Inclusivity and accessibility are central to assessment design. Tasks are clearly explained, with transparent marking criteria and regular opportunities for feedback and guidance. Assessment formats are varied to reflect different learning preferences and strengths. Students with specific learning needs are supported through reasonable adjustments and individual academic guidance.

You'll also have opportunities to personalise your assessments by selecting topics that reflect your own interests, lived experiences, and placement contexts. For example, you might evaluate a project you have contributed to during your placement or explore an issue affecting your local community. This personalisation helps make assessment meaningful, allowing you to connect your learning to your future goals and the communities you serve.

By the end of the course, you will have built a strong portfolio of evidence demonstrating your knowledge, professional skills, and ability to make an impact through sport and community development.

Further Information for Student:

Starting university is an exciting step, and this course is designed to help you feel part of a supportive learning community from day one. During Welcome Week, you'll meet your lecturers, student success coach, Wolves Foundation staff, and fellow students, take part in interactive induction activities, and get to know the Wolves Foundation facilities where your learning will take place. Early sessions will help you feel confident using the University's on-line learning environment, submitting assignments, and accessing support services.

Because work-based learning is central to the course, you'll receive structured preparation for placements through workshops and continuous mentoring from your student development officer, who links your academic study with industry experience. While on placement with Wolves Foundation, you'll have regular contact with academic staff and workplace mentors, ensuring you feel supported and confident in applying what you learn. Reflection on practice is built into many of your assessments to help you connect theory with real-world experience.

At Level 4, you'll explore the foundations of coaching and community development while adapting to university study. Workshops on academic writing, referencing, and digital skills are embedded within modules so you can apply them directly to your assignments. We recognise that students come from a range of educational and personal backgrounds, so teaching and assessment are designed to be inclusive, accessible, and supportive. Close contact with lecturers and your student success coach means you'll receive regular feedback and guidance, including opportunities for formative feedback on draft work before submission.

During placement, you'll begin by shadowing experienced coaches in different Foundation settings to build confidence before leading small sessions. Through both academic study and hands-on experience, you'll develop communication, teamwork, and leadership skills, and begin to see yourself as a developing coach and community practitioner, understanding professionalism and ethical practice in sport.

At Level 5, you'll apply your knowledge in practice and begin to position yourself as an adaptable, reflective, and employable sport professional. You'll lead sessions and small projects with increasing independence, developing employability skills such as initiative, communication, and problem-solving.

Student voice is central to the course. Feedback from module evaluations, course representatives, and informal discussions is regularly reviewed by the teaching team and Wolves Foundation partners. Your insights directly shape modules, placements, and the learning environment — keeping the course engaging, relevant, and supportive for every student.

The University provides a wide range of academic and pastoral support to help students succeed in their studies and personal development. This includes access to the Library and Skills for Learning service, personal tutors for Level 4 and 5 students, and tailored advice from the Careers and Enterprise teams. Students also benefit from 24/7 wellbeing support through WLV Student Life Connect, pastoral care via the Multi-faith Chaplaincy, and assistance from the Mental Health and Wellbeing team. Those living in university accommodation have additional access to Residential Life support, and all students can engage with the Students' Union for advocacy, societies, and further peer-led services.

Currency:

This course is designed to keep pace with a rapidly evolving sport coaching and community development sector. Module content is regularly updated to reflect current research, policy developments, and contemporary issues such as sustainability, inclusion, and the use of sport for social change. Close collaboration with Wolves Foundation ensures teaching remains connected to real-world practice and community priorities. Academic staff actively engage in research and professional consultancy, and their expertise directly informs teaching — giving students access to current debates, evidence, and innovative approaches shaping the industry.

Students are encouraged to engage with research from the very start of the course. At Level 4, you will explore how evidence underpins effective coaching and community sport development, building

confidence in reading and interpreting research. At Level 5, you will deepen these skills through applied inquiry — for example, by evaluating the impact of sport projects or exploring current community challenges. Through the development of your research skills during the Foundation Degree, you will have developed the skills and knowledge to undertake an independent Professional Project should you wish to progress onto the Top-up degree, demonstrating your ability to design, conduct, and communicate research that contributes to real-world understanding or problem-solving in your chosen area of interest.

The course also encourages creative and critical thinking about the broader role of sport in society. You will explore how sport can address complex global issues — such as health inequality, sustainability, and social responsibility — and develop the entrepreneurial mindset needed to design innovative, ethical, and impactful interventions.

The University of Wolverhampton's Graduate Attributes are embedded throughout the curriculum:

- Global Citizen – understanding diversity, equality, and the power of sport as a global connector.
- Knowledgeable – applying research and theory to inform evidence-based practice.
- Professional – demonstrating leadership, integrity, and reflective practice in real-world contexts.
- Digitally Fluent – using digital tools ethically and effectively to communicate, analyse data, and deliver projects.

Interdisciplinary collaboration is also central to the course ethos. You'll work alongside peers, staff, and community partners from a range of disciplines, helping you to see challenges from multiple perspectives and adapt to future changes in the sport industry. This approach builds confidence, creativity, and a mindset for lifelong learning — essential qualities for a successful and sustainable career in sport coaching and development.

Personalisation Opportunities:

This course is designed to help you explore what matters most to you as a developing coach and community practitioner. While all students study the same modules, there is flexibility within learning activities and assessments to focus on your personal interests, lived experiences, and future goals.

At Level 4, you will be introduced to a broad range of coaching and community development contexts through placements and classroom learning. This gives you the chance to experience working with different populations, such as young people, older adults, or underrepresented groups, and to reflect on which areas most inspire you. Assessments are designed to encourage you to apply theory to your own placement experiences, ensuring learning feels relevant and authentic.

At Level 5, you'll begin to specialise, developing your own coaching philosophy and leading projects that align with your interests. You'll receive one-to-one guidance from your student development officer and personal tutor to help you make informed choices and build a clear pathway toward employment or further study.

Inclusivity and diversity are embedded throughout the course. Case studies, discussions, and guest speakers reflect a wide range of cultural and social perspectives within sport, helping you understand how identity and lived experience influence coaching and participation. You are encouraged to draw upon your own background and experiences when contributing to class discussions, reflective journals, and project work.

Reflection is a continuous part of your learning journey. Through portfolios, feedback tutorials, and mentoring sessions, you'll evaluate your progress, identify your strengths, and set personal goals. By the time you complete the course, you'll not only have developed the skills and confidence needed to succeed in the sport and community sectors, but also a strong sense of your professional identity and how your values and experiences shape your approach to coaching and community sport development.

Employability in the Curriculum/Employability and Professional Development:

Employability and career development is embedded at the heart of the Foundation Degree in Sports Coaching, with every module designed to help you build the knowledge, skills, and professional behaviours needed to thrive in the sport, coaching, and community development sectors. From day one, you'll begin developing your professional identity through reflective practice, applied learning, and hands-on experience within Wolves Foundation.

Work-based learning is a key feature of the course. You'll complete micro-placements linked to each module, allowing you to apply theory to real-world situations while developing communication, teamwork, and leadership skills. These placements evolve across the programme — from shadowing and assisting coaches and community practitioners at Level 4, before progressing at Level 5 to take more responsibility in leading sessions and small projects. This gradual development helps you become a capable, adaptable practitioner ready for employment or further study.

You will complete authentic and career-focused assessments. Module assessments will be focused on industry-linked projects to support your ability to link theory and practice, using live-briefs to engage in project-based practice within a real-world coaching or sport development environment. You'll be expected to demonstrate initiative, leadership, and reflective thinking as you plan, deliver, and evaluate activities that contribute meaningfully to Wolves Foundation.

The course aligns with the Chartered Institute for the Management of Sport and Physical Activity (CIMSPA) coaching standards. These frameworks inform the design of assessments and learning activities, helping you understand professional expectations and sector benchmarks. This ensures you are well prepared to meet employer needs and pursue recognised professional roles in coaching, community sport, or sport development.

Career development and reflection are integrated throughout your studies. Employability workshops, delivered in collaboration with Wolves Foundation, will help you identify your strengths and areas for development. Sports coaching and sport development modules will introduce you to different pathways within the community sports coaching and development sector, supporting you to explore different career opportunities.

You can choose to progress onto the Level 6 top-up degree in Sport Coaching, but this Foundation Degree is also designed to prepare you for direct employment. By the end of the course, you will have a strong understanding of how to design and deliver inclusive coaching sessions, support community sport initiatives, and contribute to positive social change through sport.

You will leave the Foundation Degree with a professional portfolio of experience, strong industry networks, and the transferable skills that employers across sport, health, and community sectors value highly.
